20 May (Sat) • 10 AM - 12 PM

**JSS AS A SPORTING
POWERHOUSE IN THE WEST**

In JSS, we believe in developing our students' talents and nurturing them to be responsible and lifelong learners. Sports and games play a central role in equipping our students with values that are crucial in their development as leaders and contributing members of the society in future. In addition to our core values of Loyalty, Industry, Sincerity and Love, participation in sports also inculcates important values including discipline, team spirit and fair play in our students.

In the sporting arena, our sportsmen and sportswomen have achieved no less than 100 national titles since 1963. For the achievements made, JSS is widely known as the 'Sporting Powerhouse in the West'.

**JSS SPORTS EXCELLENCE
PROGRAMME**

Supported by a team of dedicated and qualified coaches, teachers and members of our Alumni Association, the key features of our Sports Excellence Programme are:

SPORTS SCIENCE WORKSHOPS

Areas of interest include youth coaching and umpiring, sports psychology and principles of training by the relevant National Sports Associations and other external partners to acquire values and skills in and beyond the games.

SPORTS SCHOLARSHIP AWARD

Supports outstanding student athletes to pursue their passion and maximise their potential.

**SERVICE LEADERSHIP
PROGRAMME**

All students on the Service Leadership Programme will learn the knowledge, skills and values needed for them to become leaders who rally others in carrying out impactful community projects. With this, they will empower the less fortunate, helping the vulnerable in society to become more self-reliant. Students will get a chance to lead and initiate projects across different Values-in-Action (VIA) platforms in the school. Some of these platforms include: >>>

**AGENCY AND
ADVOCACY**

The programme for Lower Secondary focuses on Agency, where students initiate projects that create significant impacts to improve the lives of others. In Upper Secondary, our focus on Advocacy allows students to lead and gather support to represent the 'voice for the voiceless' in community forums and dialogues.

Project COMPassion

Students of JSS initiate community-based projects to benefit the less fortunate among the residents of Taman Jurong and beyond. They will embark on a journey of heightened awareness, advocacy and activism as advocates who make a difference to the lives of others, and act on the belief that they can make a positive impact in their community.

JSS-TJ Elderly Befrienders Programme

Our students work in teams to visit elderly residents in Taman Jurong, instilling in our students the core values of graciousness and gratitude. Students on the Service Leadership Programme will lead their peers to reflect on their experiences with the elderly residents and design meaningful activities with the residents.

Citi-YMCA Youth For Causes (YFC)

Started by Citi Foundation and the YMCA of Singapore in 2003, the programme is a catalyst to promote social entrepreneurship and community leadership development among Singapore youths. Students, in teams of four, will have the opportunity to undergo training and volunteer mentorship for executing self-initiated projects to raise public awareness, funds and mobilise volunteers for Social Service organisations of their choice.

**SERVICE
LEADERSHIP**

For Students who Believe in
Making a Positive Difference
in Society

SCIENCE (SCoRe)

JSS SCIENCE COMMUNICATIONS & RESEARCH PROGRAMME

Students on our SCoRe programme will embark on a stimulating learning journey where they will channel their curiosity about natural phenomena in the world towards finding meaningful and ethical solutions through scientific inquiry and analysis.

RESEARCH PROGRAMME

Students participate in different research opportunities within and outside Singapore. The overseas immersion trip, one of the highlights of the SCoRe programme, is a platform to equip and strengthen our students' civic literacy, global awareness and cross-cultural skills through interactions with foreign students and research institutions on Science trends.

SCIENCE MENTORSHIP PROJECTS

Students engage in inquiry projects for areas that they are interested in under the guidance of a teacher or industry-mentor.
